

Drinking Water Revolving Fund 2025 Intended Use Plan

I. Introduction

The federal Safe Drinking Water Act Amendments of 1996 authorized the Drinking Water State Revolving Fund program to provide funds to states to finance drinking water projects and activities to protect public health and achieve or maintain compliance with the Safe Drinking Water Act. The Act authorizes the U.S. Environmental Protection Agency (EPA) to award annual capitalization grants to each state to capitalize a state revolving fund, which the state can use to provide loans and other assistance to public water systems. As part of its capitalization grant applications, each state must annually prepare an Intended Use Plan (IUP) that describes the intended uses of the available funds.

The Minnesota Legislature established the Drinking Water Revolving Fund (DWRP) under [Minnesota Statutes Section 446A.081](#) to receive federal capitalization grants and state matching funds. The Minnesota Public Facilities Authority (PFA) is responsible for managing the DWRP and its assets. The PFA is authorized to prepare the annual IUP based on the Project Priority List (PPL) prepared by the Minnesota Department of Health (MDH). The PFA is responsible for financial administration of the DWRP program, through which the PFA purchases the general obligation bonds of local governments to finance eligible projects (transactions which are commonly referred to as loans secured by general obligation system revenue pledges). The PFA's responsibilities include reviewing financing applications, setting loan rates, along with the terms and conditions, determining eligibility for principal forgiveness, and managing the assets of the fund. In addition to preparing the Project PPL, the MDH is responsible for reviewing projects to ensure they meet technical and environmental requirements and administering various set-aside activities authorized under the Safe Drinking Water Act.

Infrastructure Investment and Jobs Act (IIJA)/Bipartisan Infrastructure Law (BIL)

The Bipartisan Infrastructure Law (BIL) also known as the Infrastructure Investment and Jobs Act (IIJA) was signed into law November 15, 2021, and provides additional funds for drinking water infrastructure projects through the Drinking Water State Revolving Fund (DWSRF). The IIJA provides funds over a five-year period to supplement the DWSRF and provides dedicated funding to replace lead service lines and address emerging contaminants.

The PFA will use the 2025 DWRf IUP to apply for IJJA Lead Service Line Replacement (DWRf LSLR) funds, IJJA Drinking Water Emerging Contaminants funds, IJJA Supplemental funds and the 2025 base capitalization grant. States must provide a state match to receive the federal base and IJJA supplemental funds. The IJJA emerging contaminants and lead service line replacement funds do not require a state match. The Minnesota Legislature has yet to appropriate the required state matching funds for the 2025 base capitalization grants. PFA cannot draw on the IJJA supplemental or 2025 base capitalization grants funds until state match funds are appropriated.

The 2025 IUP identifies projects and activities the PFA intends to fund from the Drinking Water Revolving Fund in state fiscal year (FY) 2025 (July 1, 2024 to June 30, 2025). To fund these projects and activities, the PFA will use a combination of funds from federal base capitalization grants, IJJA funds, state matching funds when available, loan repayments, and other fund revenues. Project timing and other constraints will determine source(s) of funding used for each project as detailed in the annual drinking water report to EPA. Refer to Table 1a and 1b summaries for IUP project costs and funding need totals.

II. Project Funding

A. Project Priority List

The MDH PPL identifies drinking water projects potentially eligible to receive DWRf financing over the next five years. The PPL is a comprehensive list and includes lead service line replacement, emerging contaminant, and regular drinking water infrastructure projects. Projects are listed in priority order based on a point system established by the MDH in [Minnesota Rules 4720](#) parts 4720.9015 to 4720.9040. MDH rules give funding priority to projects that: 1) protect public health; 2) provide adequate water supply; and 3) assist water systems most in need. The 2025 PPL contains 976 projects with a total estimated cost of \$2.9 billion and is attached as an Appendix.

B. Placement on the IUP

The Intended Use Plan (IUP) identifies projects on the PPL (lead service line replacement, emerging contaminant, and regular drinking water infrastructure) eligible to apply for and receive funding through the DWRf in FY 2025. The IUP is prepared by the PFA in accordance with [Minnesota Statutes Section 446A.081](#), Subdivision 5 and [Minnesota Rules Part 7380.0255](#). To be placed on the IUP, the PFA must receive a written request signed by an official of the municipality (city, township, county, or water district) or other public water system entity that will be the borrower for the loan for each project. Each request must include a schedule indicating that the applicant expects the project to receive all necessary approvals and proceed to the point of receiving DWRf funding within approximately one year from the approval of the 2025 IUP.

Placement on the IUP is not a guarantee of DWRf funding. Minnesota has significant drinking water infrastructure needs and the PFA balances loan demand and lending capacity when setting a fundable range for projects on each IUP to preserve lending capacity for future needs. Projects in the IUP fundable range must complete the loan application process with the PFA and receive project certification from the MDH under the provisions of [Minnesota Rules Part 4720.9060](#) before a DWRf loan can be approved.

The approved IUP remains effective until the following year's IUP is approved. A project listed in the IUP fundable range that does not receive a loan but submits a loan application to the PFA and is certified by the MDH by June 30, 2025 will be carried over in the fundable range on the next IUP.

C. Draft IUP, Public Review and Comment

In January 2024, a notice was sent to all public water systems in the State with information about the DWRf program and IJA funds, including instructions on how to request placement on the PPL and IUP. An announcement was posted on the PFA website, and a GovDelivery notice sent out to interested persons. PFA and MDH staff presented information about the DWRf program and the IUP/PPL process at various conferences, workshops, and webinars with prospective DWRf participants and other interested parties.

Based on the requests received, staff prepared and presented a draft 2025 IUP to the PFA Board on October 11, 2024. The PFA Board approved the fundable range and base interest rate discount for the 2025 IUP (see paragraphs D – IUP Project List and G and H – Terms and Conditions) and authorized the draft IUP to be made available for public review and comment. Public comments on the draft 2025 IUP will be accepted through November 18, 2024.

A notice along with a link to the draft IUP will be posted on the PFA website, sent out via a GovDelivery notice, sent out to prospective participants, the consulting engineering community, local government associations and organizations and interested parties.

Following a review of the comments received and any appropriated changes, the PFA expects to approve the 2025 IUP on or about November 30, 2024.

D. IUP Project List

2025 IUP projects are shown in two separate tables: **Table 1a, Project List – Regular and Emerging Contaminant Projects** on pages 15-20 and **Table 1b Project List – Lead Service Line Projects** on pages 21-23.

IUP TABLE 1a

Table 1a, Part A - Fundable: Carryover Projects from Prior IUPs lists carryover projects from prior IUPs that submitted loan applications to the PFA and received technical approval and certification from the MDH by June 30th of the given year. Pursuant to Minnesota Rules 7380.0255 subpart 1A, these projects are fundable in FY 2025 and the PFA will award funding when each project completes the application and bidding process. Table 1a identifies 68 carryover projects, including six emerging contaminant projects, with total requested loans exceeding \$277 million. PFA will fund Emerging Contaminant (EC) projects with a combination of EC principal forgiveness and DWRP loans. Some carryover projects have also tentatively been identified for additional subsidization or WIF grants for affordability as further explained in Sections I and J below.

Table 1a, Part B1 – FUNDABLE: New IUP Requests - Emerging Contaminant Projects lists 18 new project requests totaling \$167 million in estimated loans and \$47 million in estimated Emerging Contaminant principal forgiveness and \$15.2 million in other funding. Some of these new Part B-1 projects may also qualify for federal principal forgiveness or WIF grants for affordability needs.

Table 1a, Part B2 – NOT FUNDABLE AT THIS TIME: New Project Requests - Non Emerging Contaminant Projects lists 76 new project requests ranked with 7 points or more on the PPL totaling \$336 million in estimated loans. Without appropriation of state matching funds, the PFA cannot fund new project requests at this time. If the Legislature appropriates required state matching funds in the future, then PFA may amend the 2025 IUP following the process described in Section E below. Some new Part B projects may qualify for federal principal forgiveness or WIF grants based on affordability.

Table 1a, Part C Projects not eligible at this time - lists 46 projects for \$135 million that are not currently eligible because they are below the historic DWRP fundable range, are small communities that are being referred to USDA Rural Development for possible loan and grant funding or are outside of the scope of the 2025 IUP schedule.

IUP TABLE 1b

Table 1b, Part A – Fundable: Carryover Projects from Prior IUPs – Lead Service Lines lists 23 carryover projects for \$42 million from the 2024 IUP that applied to the PFA and received technical approval and certification from the MDH by June 30, 2024. Pursuant to Minnesota Rules 7380.0255 subpart 1A, these projects are fundable in state fiscal year 2025 and the PFA will award funding when each project completes the application and bidding process. These projects will be funded with DWRP-LSLR funding and/or Minnesota’s new Lead Service Line Replacement (State LSLR) grant program as described in Sections I, K and L below.

Table 1b, Part B – Fundable: New Project Requests – Lead Service Lines lists 52 projects requesting \$119 million in lead service line financing.

The PFA in consultation with the MDH, has set the 2025 IUP fundable range to include:

- All carryover projects on Tables 1a and 1b (Regular, Emerging Contaminants and LSLR)
- All new Emerging Contaminant projects on Table 1a, Part B1, and
- All new Lead Service Line projects in Table 1b, Part B

E. Possible IUP Amendment

If the PFA receives an appropriation for state matching funds in FY 2025, the PFA may amend the 2025 IUP to set a fundable range for new Part B projects.

F. Loan Application Requirements and Deadlines

Table 1a, Part A (carryover projects) have met the loan application submittal deadline and have submitted plans and specifications to the MDH.

Table 1a, Part B1 (New Emerging Contaminants projects) will have six months from approval of the IUP to submit a loan application to the PFA. Plans and specifications should be submitted to MDH by March 28, 2025 to allow project certification to be completed by the end of the 2025 SFY (June 30, 2025).

Table 1b, Part A (carryover LSL project) have met the loan application submittal deadline and have submitted plans and specifications to the MDH.

Table 1b, Part B (new Lead Service Line) projects will have six months from approval of the IUP to submit a loan application to the PFA. Plans and specifications should be submitted to MDH by March 28, 2025 to allow project certification by the end of state fiscal year 2025 (June 30, 2025).

G. Loan Terms and Conditions - Regular and Emerging Contaminant (Loan Funded Portion) Projects

PFA determines terms and conditions for DWRP loans pursuant to [Minnesota Statutes Section 446A.081](#) and [Minnesota Rules Part 7380.0265](#). Construction loans are not awarded until as-bid construction costs are submitted to the PFA. PFA makes DWRP loans at below-market rates in accordance with federal and state law. The basis for setting interest rates is described in [Minnesota Rules Part 7380.0272](#). PFA bases interest rates on the greater of the current bond market rates for AAA or AA rated municipal bonds as determined by a daily index, (or the bond yield scale of the PFA's bonds if PFA bond proceeds are available) less any discounts described below. The interest charged includes a servicing fee up to 2% of each loan payment. PFA uses fee revenues to pay program administrative expenses. Fees are non-program income.

For projects receiving loan awards after the 2025 IUP is approved, the PFA has set a base discount of 1.0% that will be applied to the appropriate bond yield scale for loans up to \$28 million, with no base discount applied to loan amounts in excess of \$28 million.

Additional discounts up to 2.0% may be applied to borrowers under 2,500 population as described in [Minnesota Rules Part 7380.0272](#), Subpart 3B. These discounts take project affordability into account. The minimum interest rate under PFA rules is 1.0%.

The standard loan term is 20-years or up to 30 years for projects meeting disadvantaged community criteria describe in Section I below. No loan term can exceed the useful life of the project.

To manage large project requests within the DWRP annual lending capacity, the PFA may provide separate financing agreements over more than one year based on the project's cash flow needs as negotiated between PFA and the borrower.

H. Loan Terms and Conditions – DWRP LSLR Projects (Public Portion)

Terms and conditions for DWRP LSLR loans are established in Minnesota Statutes, Section 446A.081, Subd 8 (h). The interest rate on loans for lead service line projects 0% with principal payments commencing not later than 18 months after the completion of the project.

Refer to Section L for information on the State LSLR grant program.

I. Additional Subsidization

Federal capitalization grants require states to use certain percentages of the federal funds for additional subsidization beyond below-market interest rates for projects meeting specific criteria. The 2024 regular (base) capitalization grant requires a minimum of 26% and a maximum of 49% to be used for additional subsidization. IJA Supplemental and LSLR capitalization grants require 49% to be used for additional subsidization. IJA Emerging Contaminant capitalization grants require 100% to be used for additional subsidization. Table 2 on pages 24-26 show the amounts the PFA intends to take from capitalization grants received in FY 2024 and expected in FY 2025.

The PFA provides additional subsidization to eligible projects in the form of principal forgiveness (PF) grants, meaning a reduction in the amount of loan principal that must be repaid which is granted when PFA awards a DWRP financing agreement. The PFA awards PF grants to address affordability in disadvantaged communities, for replacement of lead service lines, and for projects that address emerging contaminants.

1. Disadvantaged Community Principal Forgiveness (affordability)

Minnesota Statutes, Section 446A.081, Subd 9(a)(9) authorizes PF grants for disadvantaged communities based on affordability criteria established for the state Water Infrastructure Funding (WIF) grant program in Minnesota Statutes, Section 446A.072. WIF and PF grants based on affordability are used to help municipalities build projects to replace aging and obsolete water

systems that would otherwise create a significant financial hardship for the municipality and its residents. The methodology measures the financial impact on municipal users based on the total system costs including annual operation and maintenance, annual debt service for prior capital improvements and projected new debt service for the proposed project. The total system costs are divided by the number of residential users (measured by equivalent residential units) to determine the average cost per household. If the average cost per household exceeds 1.2% of the service area's median household income (MHI) the proposed project is eligible for either PF or WIF grants for up to 80% of project costs.

PFA determines eligibility for PF or WIF grants based on analysis of financial information included in DWRf loan applications. PF or WIF grant funds are reserved and awarded to eligible projects based on their PPL ranking, beginning first with carryover projects (that received technical approval and certification in a prior fiscal year), followed by new IUP projects. The PFA expects to have approximately \$34 million in PF funds for disadvantaged communities available in FY 2025. IUP Table 1a shows an estimated \$26.4 million in disadvantaged community (affordability-based) PF needs for IUP carryover projects. Combined with state WIF grant funds, PFA expects to meet affordability needs for all 2025 carryover projects, and will evaluate PF/WIF grant eligibility for new projects when they are placed in the IUP fundable range and submit DWRf loan applications.

2. Emerging Contaminant Principal Forgiveness

Minnesota Statutes, Section 446A.081, Subd 9(a)(12) authorizes PF grants for Emerging Contaminant projects for 50% of project costs up to a maximum of \$3,000,000. The PFA expects to have approximately \$36 million in PF funds available for Emerging Contaminant projects in FY 2025. IUP Table 1a shows \$13 million in estimated principal forgiveness for carryover projects and \$47 million for estimated PF for new EC project requests. PF funds for Emerging Contaminant projects are reserved and awarded for projects based on their PPL ranking, beginning first with carryover projects (that received technical approval and certification in a prior fiscal year), followed by new IUP projects. If sufficient PF funds are not available, a project may remain on the IUP as a carryover project and eligible funding will be reserved and awarded when new appropriations are available.

3. DWRf LSLR Principal Forgiveness (Disadvantaged Communities)

Federal IJIA funds dedicated to lead service line replacement (LSLR) require 49% to be used for principal forgiveness (PF), with the remainder to be divided between various set-asides (up to 26%) and loans. The PFA expects to have approximately \$83 million in PF funds available in FY 2025 for LSLR projects. These funds will be used for private lead service line replacement costs in disadvantaged communities.

PFA has reviewed how its disadvantaged community definition based on WIF affordability criteria can be applied to lead service line projects. A significant portion of drinking water service lines

are owned by property owners and municipalities cannot use system revenues to pay the cost to replace privately-owned portions. Generally, special assessments to each individual property owner have been the only way to pay the private portion of the lead service line replacement cost, resulting in the cost impact falling on each property owner rather than over a municipality's entire user base. This could result in significant costs to each property owner that may be an affordability barrier to replacing the lead service line.

In determining LSLR projects that are eligible for federal PF funds, PFA will look at the combined financial impact from existing water rates for system users in the municipality plus the cost of a potential special assessment for replacement of the lead service line. If the total cost exceeds 1.2% MHI of the municipality, or the census tract(s) of the project area, the project will be eligible for federal PF for the cost of the privately owned LSL.

Section J below addresses more fully how federal and state funds will be coordinated to fund all LSLR project costs.

J. Coordinated Federal/State LSLR Funding

In recognition of the serious public health concerns from lead service lines, in 2023 the Minnesota Legislature created the Lead Service Line Replacement Grant program in Minnesota Statutes, Section 446A.077. The state program is designed to coordinate with federal LSLR dedicated funds to maximize benefits for both municipalities (publicly owned LSLs) and privately owned LSLs. The state set a goal to remove all lead service lines in public drinking water systems by 2033 and appropriated \$240 million for the program (with 10% for LSL inventories).

To maximize the use of federal PF funds, PFA will use available federal PF funds to replace the privately owned lead service lines for disadvantaged communities as described in Section I3, and state grant funds replace privately owned lines in all other communities. Minnesota law requires grant funds to pay for 100% of project costs for privately owned lead service lines.

To maximize the use of federal dedicated LSLR loan funds, PFA will initially award loan funds for up to 100% of project costs to replace publicly owned portions of lead service lines. As project work is completed, PFA will provide state grant funds to the municipality to repay the loan. The Minnesota program requires that the first priority for use of state grant funds is to repay debt incurred for LSLR projects.

Recipients of federal and state LSLR funds must replace the entire lead service line, not just a portion, unless a portion has already been replaced or is concurrently being replaced with another funding source.

Under the state LSLR grant program, applicants must submit a plan to the MDH that describes how they will prioritize the expenditure of funds, including:

- Removing LSLs that are imminent threat to public health and safety;

- Targeting areas with children with elevated blood lead levels;
- Targeting areas with children under the age of five;
- Targeting LSLs that provide drinking water to schools, licensed child-care facilities, or other properties known to be used by disproportionately large numbers of children;
- Targeting areas with lower-income residents and other disadvantaged communities;
- Coordinating the replacement of publicly owned and privately owned portions of LSLs;
- Coordinating the replacement of LSLs with watermain replacement projects for the most efficient use of money.

K. DWRf Federal and State Requirements

DWRf-funded projects are subject to both federal and state requirements. Additional information on the requirements is detailed in the PFA application materials and contract packet which are available on the PFA website.

The IIJA signed into law November 15, 2021 ([Public Law 117-580](#)) included additional Drinking Water State Revolving Fund requirements. The Build America, Buy America (BABA) Act is domestic sourcing requirement for federal financial assistance programs for infrastructure. An EPA Amended Adjustment Period Waiver has sunset and limits which projects qualify for the waiver. Consult with your loan officer and MDH for additional information.

III. Summary of FY 2024 Project Activity

A total of 53 municipal drinking water projects on the 2024 PPL totaling \$183 million were funded in FY 2024 through the coordinated efforts of the PFA and other funding partners. See Table 4 for details on funded projects.

IV. Financial Status of the DWRf

Tables 2a and 2b (pages 24-26) shows the sources and uses of funds in the DWRf for FY 2024, the total amounts from FY 1998 through FY 2024, and the estimated amounts for FY 2025.

The PFA has developed a financial model to estimate the average annual lending capacity of the DWRf based on the current assets in the fund. The PFA currently estimates the average DWRf lending capacity to be approximately \$56 million per year in perpetuity, assuming that federal capitalization grants (Base and IIJA Supplemental) and related state match continue through FFY 2026. In many years, the PFA has used its reserves and revenue bonding authority to make loans at higher levels based on strong demand. PFA issued revenue bonds in SFY 2024 to leverage additional loan funds.

Demand for DWRf financing continues to grow, and total project requests (for non-lead service line replacement projects) for the 2025 IUP are nearly \$780 million, more than 14 times the

sustainable long-term lending capacity of the DWRF. Funding demand has always exceeded annual lending capacity, which the PFA has addressed by establishing a cap on the base interest rate discount and a fundable range for new project requests based on PPL priority points. However, the lack of a state matching funds appropriation for future capitalization grants requires the PFA to further limit fundable projects on the 2025 IUP. To maintain balance between current demand and future lending capacity, the PFA in consultation with the MDH, each year determines a fundable range for new project on the IUP based on PPL priority points.

Lead Service Line projects are funded separately and do not impact the lending capacity of the Fund.

In approving the 2025 IUP, the PFA commits to providing DWRF loans to all Table 1a Part A carryover projects and Table 1a Part B1 new Emerging Contaminant projects, a total of \$443 million in estimated loans in fundable range. Actual projects loans the PFA expects to move ahead under this 2025 IUP is less, approximately \$293 million. While the total requested carryover loans exceeds the sustainable lendable capacity of the Fund, it is within a manageable level that the Fund can support in the short term. In the long term, however, without continued state support for the program, funding beyond the Fund’s annual lending capacity will decrease its future lending capacity.

V. Set-Asides

In addition to financing drinking water projects, the federal Safe Drinking Water Act allows states to set-aside a percentage of capitalization grant funds, including IJJA funds, for certain non-project activities, up to a maximum of 31%. States that take less than the maximum allowed amounts may choose to “bank” or “reserve” some set-asides to potentially take later from future capitalization grants, thereby maximizing the federal funds used for project loans in the short-term while preserving the ability to take a higher level of set-asides from future grants for needed set-aside activities. Table 3A identifies reserved and banked set aside funds.

Set-asides funds for the Year 3 IJJA funds and expected 2025 Base were identified in consultation with the MDH. The PFA, in consultation with the MDH, intends to use up to the percentages and amounts identified in the chart below for set-aside activities. Congress has not yet appropriated funds for the 2025 base capitalization grant so only the percentages are reflected in the chart below.

Set-Aside Funds by Capitalization Grant Type 2025 IUP												
Capitalization Grants		Program Administration		PWSS		Small System Technical Assistance		Local Assistance		Wellhead Protection		Total
		(\$)	(%)	(\$)	(%)	(\$)	(%)	(\$)	(%)	(\$)	(%)	(\$)
Base 2025*	TBD	\$ -	0%	\$ -	0%	\$ -	0%	\$ -	0%	\$ -	0%	\$ -
IJJA Supp Yr 3	\$ 34,769,000	\$ 1,390,760	4%	\$ 3,476,900	10%	\$ 695,380	2%	\$ -	0%	\$ 3,476,900	10%	\$ 9,039,940
IJJA LSLR Yr 3	\$ 85,566,000	\$ 3,422,640	4%	\$ -	0%	\$ 1,711,320	2%	\$ 8,556,600	10%	\$ -	0%	\$ 13,690,560
IJJA EC Yr 3	\$ 11,557,000	\$ 462,280	4%	\$ 231,140	2%	\$ -	0%	\$ -	0%	\$ -	0%	\$ 693,420
	\$ 131,892,000	\$ 5,275,680		\$ 3,708,040		\$ 2,406,700		\$ 8,556,600		\$ 3,476,900		\$ 23,423,920

*The Base 2025 cap grant amount has not yet been allocated.

Set-asides taken from the Emerging Contaminants and DWRf LSLR capitalization grants can only be used for activities related to emerging contaminants and lead service line activities. MDH uses Emerging Contaminant set aside funds to pay MDH staff who will work directly with water supply systems with emerging contaminant issue. Eligible uses are engineering and environmental review, communications, and assisting applicants in applying for funding.

MDH will use LSL set-aside funds to pay for MDH staff working directly with LSL projects, including engineering and environmental review, communications, outreach and technical, assistance to applicants. MDH issued a Request for Proposal and developed a list of prequalified consulting engineers who can conduct LSL inventories. Public water systems can apply for grants to the MDH for LSL inventory work during application periods to utilize contract services. MDH will continue to contract with Minnesota Rural Water Association (MWRA) to provide training and technical assistance to complete inventories. MDH will also continue to contract with the University of Minnesota to continually update the lead inventory tracking tool which allows residents to search by address to determine if they have a lead service line (<https://maps.umn.edu/LSL/>).

MDH will prepare workplans detailing set-aside activities and they will be submitted with the capitalization grant applications to EPA.

VI. Transfers

Federal regulations allow transfers up to 33% of cumulative federal capitalization grants from Drinking Water to Clean Water or vice versa. Per EPA, transfers of EC funds are based on the IJJA drinking water capitalization grant allotments.

PFA transferred Year 1 and 2 Clean Water Emerging Contaminant funds to the Drinking Water fund. MPCA is proposing possible statute changes to the CWRf program to allow the use of the EC funds for CWRf projects. If the statute changes are enacted by the legislature, the EC funds will be used for eligible CWRf projects otherwise the Year 3 IJJA CW EC funds will be transferred to the DWRf.

VII. Drinking Water Revolving Fund Goals

The primary objective of the DWRf is to provide loans to public water suppliers. The descending order of loan priority is to: 1) resolve infrastructure problems that pose the most serious risk to public health, 2) bring systems into compliance with drinking water requirements, and 3) assist systems in most financial need. A lower program priority is to provide suppliers with proactive assistance and support so they can operate their systems more effectively and appropriately. This assistance is accomplished through the set-aside activities of operator certification, technical assistance to small systems, capacity development, and wellhead protection. The lowest program priority is to provide loan assistance to maintain systems in a sound condition and in compliance with public water supply standards.

Short Term Goals:

1. Continue to negotiate loan amounts with applicants funded on an annual cash flow basis to meet project needs while limiting the annual impact on the DWRf.
2. Continue to promote asset management for DWRf recipients.
3. Utilize set-asides to provide technical assistance for LSLR projects and conduct RFP for LSLR inventory work (MDH).
4. Actively coordinate DWRf loans with other PFA funding, including state Water Infrastructure Funds (WIF) grants and other state and federal agency programs to maximize the number of projects funded on the Project Priority List.
5. Coordinate Emerging Contaminants projects for small and disadvantaged communities with the Department of Health's Small Underserved and Disadvantaged Community (SUDC) grant funding.
6. Coordinate the State's LSLR grant program with the DWRf LSLR funds.
7. Coordinated emerging contaminants projects with the MDH's Small Underserved and Disadvantaged Communities (SUDC) grant funds.

Long Term Goals:

1. Provide financial and other assistance (including the set-aside activities) to public water supply systems to protect the public health and achieve and maintain compliance with the Safe Drinking Water Act, while following sound lending practices.
2. To the maximum extent possible, provide timely funding for all projects that receive technical approval and certification from the MDH, including projects eligible for principal forgiveness and WIF.
3. Leverage the capitalization grants as appropriate to finance as many projects as possible while maintaining sufficient cash flows to meet future project needs.
4. Manage the assets of the Fund in perpetuity so that it is a permanent resource to assist public water systems in the State.
5. To implement technological solutions to increase efficiencies with program operations.
6. To make funds available to as many high-priority projects as possible while maintaining a steady and sustainable fundable range.

Set-Aside Goals:

1. Public Water System Program Administration. Maintain an up-to-date, statewide public water system program that consists of providing technical expertise, establishing standards, monitoring, education, enforcement, and public information.
2. Technical Assistance to Small Systems. Provide personal, non-regulatory technical assistance to water supply operators so they can effectively manage the complexities of the systems they operation, and for operators whose systems utilize

- groundwater, to also identify and manage potential sources of contamination, including LSLR activities.
3. Wellhead Protection. To implement Minnesota's EPA approved wellhead protection program to effectively manage potential contaminant sources in the areas that contribute water to wells.
 4. To implement the DWRP LSLR Technical Assistance Master Contract and Inventory activities.

VIII. Cross-Collateralization

Since 1997, the PFA has cross-collateralized bonds sold for the DWRP and CWRP to enhance the security of bonds sold for both programs, thereby improving the credit rating and reducing the interest rate on the bonds. Cross-collateralization allows the PFA to pass on the best possible interest rates to its borrowers. The revenues from loan repayments in each program are pledged first to the bonds for that program. After the revenues in each program have been used to make the PFA's bond debt service payments and meet all other payment and coverage requirements under the bond resolutions, funds exceeding these requirements may be used to cover a default in the other program.

Given the coverage requirements the PFA must meet for its bonds, the general obligation pledges provided by the borrowers, and the financial management practices of the PFA (as reflected by the AAA rating of its bonds), it is very unlikely that a default would occur. The cross-collateralization of the two programs will, however, provide even more assurance to the bondholders and enhance the financial strength of the programs.

IX. Tables and Appendix

Table 1: 2025 Intended Use Plan Project List (pages 15-23)

Notes:														
(1) Estimated principal forgiveness grant from Federal DWSRF I/JA/BIL funds dedicated to addressing Emerging Contaminants. State law limits to 50% of eligible project costs up to \$3,000,000.														
(2) Under federal law portions of federal DWSRF funds, including 49% of I/JA/BIL Supplemental funds, must be provided as principal forgiveness (grants) to disadvantaged communities. Principal forgiveness grants are authorized under Minnesota Statutes, Section 446A.081, subdivision 9(a)(8) to address disadvantaged community needs based on affordability criteria established for the state Water Infrastructure Funding (WIF) grant program. Eligibility for principal forgiveness grants cannot be determined until a complete loan application is received.														
(3) Estimated state Water Infrastructure Fund (WIF) grants are based on affordability criteria in Minnesota Statutes, Section 446A.072, Subdivision 5a(c). Eligibility for WIF grants cannot be determined until a complete loan application is received.

DWRF Intended Use Plan - Fiscal Year 2025 - DRAFT

Table 2a. Sources and Uses of Funds (excluding Lead Service Line Replacement) (continued)

- (1) The fiscal year 2024 amount reflects the FFY 2023 regular award plus a national reallocation from prior year awards not used by other states.

Capitalization Grant Allocations:	Regular FFY 2023		Re-allocation	
Loans	52%	3,884,400		
Principal Forgiveness	26%	1,942,200	100%	154,000
Set-asides:				
DWRF Administration				
Tech. Assist to Small Sys	2%	149,400		
PWSS Admin	10%	747,000		
PWSS Admin in-kind thru EPA				
Wellhead Protection	10%	747,000		
		7,470,000		154,000

- (2) The fiscal year 2025 amount reflects the expected awards for the following 5 grants:

Capitalization Grant Allocations:	IIJA Year 2-Supplemental		IIJA Year 2-EC		Regular FFY 2024	
Loans	25%	7,962,500			74%	5,253,000
Principal Forgiveness	49%	15,606,500	96%	14,845,900	26%	1,842,000
Set-asides:						
DWRF Administration	4%	1,274,000	3%	465,400		
Tech. Assist to Small Sys	2%	637,000				
PWSS Admin	10%	3,045,000	1%	232,700		
PWSS Admin in-kind thru EPA		140,000				
Wellhead Protection	10%	3,185,000				
		31,850,000		15,544,000		7,095,000

Capitalization Grant Allocations:	IIJA Year 3-Supplemental		IIJA Year 3-EC	
Loans	25%	8,692,250		
Principal Forgiveness	49%	17,036,810	94%	10,863,580
Set-asides:				
DWRF Administration	4%	1,390,760	4%	462,280
Tech. Assist to Small Sys	2%	695,380	2%	231,140
PWSS Admin	10%	3,476,900		
PWSS Admin in-kind thru EPA				
Wellhead Protection	10%	3,476,900		
		34,769,000		11,557,000

- (3) The fiscal year 2024 amount reflects the appropriations made in the 2024 session (none).
- (4) Revenue Bond Proceeds (net), and Bond Debt Service are net of refunding activity. Anticipated proceeds in fiscal year 2025 reflect that no anticipated bond sale is needed.
- (5) Binding commitments are recorded when the financing agreement is fully executed, after project certification by the MDH and submittal of as-bid costs to the MPFA. Amounts shown are net of decreases to prior years' binding commitments. New binding commitments for fiscal year 2024 were \$96,222,911.
- (6) Additional subsidization provided as principal forgiveness as authorized under federal law and MN Statutes 446A.081, Subdivision 9 and 446A.072.
